

Compact cylinder DPDM, multimount

FESTO

Key features

At a glance

- Double- and single-acting versions
- With and without protection against rotation
- Easy to interchange compared to the compact cylinder DMM
- Simple to mount thanks to a range of mounting interfaces
- Optional: heat-resistant up to 120 °C

Comparison of compact cylinder DMM and compact cylinder DPDM

- All mounting interfaces of the compact cylinder DPDM are compatible with those of the compact cylinder DMM
- Compared to the DMM, however, the DPDM is noticeably shorter, giving a lower product weight for the same functionality

Mounting options

Mounting at the front

Mounting at the rear

Vertical mounting

Horizontal mounting

For manufacturing lithium-ion batteries

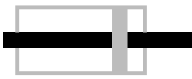

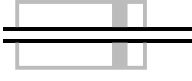

DPDM-...-F1A

Recommended for production plants for manufacturing lithium-ion batteries
Metals with more than 1% copper, zinc or nickel by mass are excluded from use.
Exceptions are nickel in steel, chemically nickel-plated surfaces, circuit boards, cables, electrical plug connectors and coils

Accessories

Please contact your Festo representative for information on which accessories are suitable for manufacturing lithium-ion batteries.

Key features

Variants from the modular product system		
Symbol	Key features	Manual
	T Through piston rod	The piston rod can be used for connection at both ends of the cylinder
	H Through, hollow piston rod	The piston rod can be used for connection at both ends of the cylinder. The piston rod is hollow inside. This means it can be used to carry vacuum or compressed air
	T1 Heat-resistant seals	Temperature range 0 ... +120 °C
	F1A Recommended for production plants for manufacturing lithium-ion batteries	Cylinders free of copper, zinc and nickel ($\leq 1\%$)

Application example

Stopping small parts
