

P Cylinder (Cylinder with Positioner) CPA2/CPS1 Series

CPA2 $\varnothing 50, \varnothing 63, \varnothing 80, \varnothing 100$

CPS1 $\varnothing 125, \varnothing 140, \varnothing 160, \varnothing 180, \varnothing 200, \varnothing 250, \varnothing 300$

- The cylinder positioning in proportion to the input signal (air pressure) is possible.
- Correction operation function: Returns to the initial setting position even when the position deviates due to load variations.

How to Order

Bore size $\varnothing 50$ to 100

Bore size $\varnothing 125$ to 300

Specifications Note 1)

Item	Model	
	CPA2	CPS1
Input pressure	0.02 to 0.1 MPa	
Supply pressure	0.3 to 0.7 MPa	
Linearity <small>Note 2)</small>	Within $\pm 2\%$ F.S.	
Hysteresis <small>Note 2)</small>	Within 1% F.S.	
Repeatability <small>Note 2)</small>	Within $\pm 1\%$ F.S.	
Sensitivity <small>Note 3)</small>	Within 0.5% F.S.	
Air consumption <small>Note 3)</small>	18 L/min (ANR) or less (SUP = 0.5 MPa)	
Ambient and fluid temperature	-5°C to 60°C (No freezing)	0°C to 60°C (No freezing)
Coefficient of temperature	0.1% F.S./°C	
Stroke adjustment margin	Within 10% F.S.	
Applicable cylinder stroke	25 mm (Min.) to 300 mm (Max.)	30 mm (Min.) to 300 mm (Max.)
Air connection port	Rc1/4 female thread <small>Note 2)</small>	

Note 1) Specification values are given at normal temperature (20°C).

Note 2) Characteristics relating to accuracy differ depending on combination with other constituent loop equipment, such as positioners and actuators.

Note 3) Air consumption is due to exhaust from nozzle. And (ANR) indicates JIS B0120 standard air.

Construction/Principle of Operation

When input pressure enters input chamber ①, the input diaphragm ③ is deflected left. Clearance of the nozzle ⑥ is reduced causing higher back pressure at diaphragm A ⑦.

This diaphragm A ⑦ has larger area than diaphragm B ⑧ resulting in movement of the spool to the left. Supply pressure then flows to OUT1 ① and the air inside the cylinder is exhausted from OUT2, resulting in cylinder rod ⑤ movement to the right. The movement is linked via connecting rod ④ and feedback spring ② to the input diaphragm ③ balancing the higher pressure. When this occurs nozzle ⑥ clearance increases allowing centralizing of the spool ⑨ to take place. This holds the piston rod in the new position. Input signal increase results in proportional movement of the piston rod.

Note 1) Use only dehumidified and dust extracted clean compressed air as the air supply.

Note 2) Install a cylinder so that the cylinder rod might not be twisted.

Note 3) Do not apply force to the protective cover of the feedback spring.

Note 4) The zero point is subject to the mounting position. Adjust zero point after installation on the site.

Note 5) Do not use a lubricator.

Note 6) Cylinder dimensions are the same as those of the CA2 series. Please contact SMC for details.

Note 7) When using the cylinder outdoors, take measures to avoid wind and rain.

- Note 1) Use only dehumidified and dust extracted clean compressed air as the air supply.
- Note 2) Install a cylinder so that the cylinder rod might not be twisted.
- Note 3) Do not apply force to the protective cover of the feedback spring.
- Note 4) The zero point is subject to the mounting position. Adjust zero point after installation on the site.

- Note 5) Do not use a lubricator.
- Note 6) Cylinder dimensions are the same as those of the CS1 series. For details, refer to the Best Pneumatics No. 2-1.
- Note 7) When using the cylinder outdoors, take measures to avoid wind and rain.

Dimensions of Accessories

CPA2 Series

Single knuckle joint assembly

Double knuckle joint assembly

Bore size	Dimensions of accessories				
	ϕLA_{d9}	LB	NX	NY	NZ
50	$12_{-0.050}^{-0.093}$	74	$16_{+0.1}^{+0.3}$	$16_{-0.3}^{-0.1}$	38
63	$12_{-0.050}^{-0.093}$	74	$16_{+0.1}^{+0.3}$	$16_{-0.3}^{-0.1}$	38
80	$18_{-0.050}^{-0.093}$	87	$28_{+0.1}^{+0.3}$	$28_{-0.3}^{-0.1}$	55
100	$20_{-0.065}^{-0.117}$	102	$30_{+0.1}^{+0.3}$	$30_{-0.3}^{-0.1}$	61

- * A knuckle pin, split pins and flat washers are included with the double knuckle joint.
- * Rod end nut is included with the cylinder.

CPS1 Series

Single knuckle joint

Double knuckle joint assembly

Bore size	Dimensions of accessories				
	ϕLA_{d9}	LB	NX	NY	NZ
125	$25_{-0.117}^{+0.065}$	121	$32_{+0.1}^{+0.3}$	$32_{-0.3}^{-0.1}$	$64_{-0.3}^{-0.1}$
