

Quarter turn actuators DFPD

FESTO

Festo Core Range
Solves the majority of your automation tasks

With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery.

Worldwide: Quickest delivery – wherever, whenever
Simply good: Expected high Festo quality
Fast: Easy and fast to select

The Core Range offers you the best value for your automation tasks.

star!

Key features

Function

The DFPD series features a gear rack and pinion combination with a constant torque characteristic across the entire swivel range. It is available in sizes 10 to 2300. The DFPD is suitable for the automation of butterfly valves, ball valves and air dampers.

It is also suitable for water/wastewater, beverage, pharmaceutical and process automation. The modular and compact design of the DFPD offers various spring configurations as a suitable solution for different applications.

[1] The position of the shaft in the delivery condition

Types of connection

- Port pattern to NAMUR VDI/VDE 3845 for mounting solenoid valves, position sensors and positioners
- Standards-based connection to process valve, ISO 5211

Variants

High temperature DFPD-...-T4	Low temperature DFPD-...-T6	Closes to the left and right DFPD-...-R/L	Spring configuration DFPD-...-S

 - **Note**

The semi-rotary drive is designed to switch to a specific position by spring force when de-energized. A loss of at least 30% of the calculated torque is expected as a result of spring relaxation and friction.

Please consider an appropriate safety factor when selecting and configuring your drive.

 **Note**
 The semi-rotary drive is designed to switch to a specific position by spring force when de-energized. A loss of at least 30% of the calculated torque is expected as a result of spring relaxation and friction.
 Please consider an appropriate safety factor when selecting and configuring your drive.

1) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

2) Packaging unit
