

Positioner CMSX

FESTO

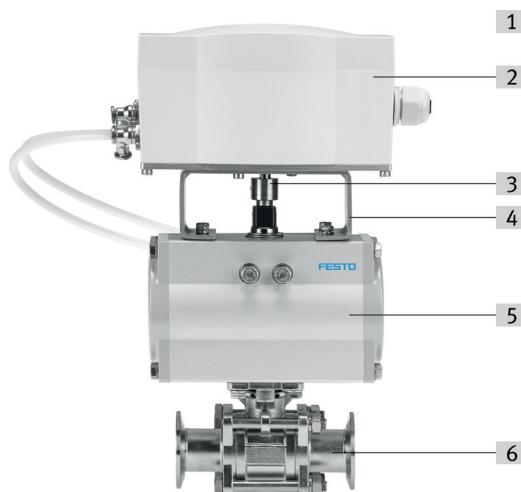

Characteristics

At a glance

The CMSX is a digital, electropneumatic positioner that enables simple and efficient control of the position of process valves actuated by pneumatic actuators. This sturdy and compact positioner can be mounted on actuators using a mechanical interface in accordance with VDE/VDI 3845-1 (IEC 60534-2). There are product variants for single- or double-acting drives, different flow rates and fail-safe positions (fail-safe mode/opening or closing in the event of system failure, Fail in Place/holding position in the event of system failure). Product variants for the connection of external displacement/angle sensors enable remote the position of process valves to be controlled remotely. The device can be operated using three pushbuttons inside the housing and an LCD display. Commissioning is simple and robust thanks to an automatic initialisation function. The setpoint is set using 0/4 ... 20 mA current signals or 0 ... 10 V voltage signal, and the analogue position feedback using a 4 ... 20 mA current signal. The device status is indicated by a digital alarm output. In addition, a configurable digital input and two configurable digital outputs are available for feedback on the position limit value. Several configurable software functions make the CMSX flexible for any task.

Design type

[1] Higher-level system (PLC/IPC or external setpoint generator)

[2] Positioner CMSX

[3] Mechanical coupling

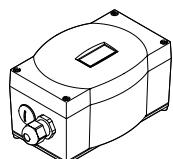

[4] Mounting adapter DARQ

[5] Quarter turn actuator (example: DFPD)

[6] Process valve (example: VZBD)

[S]

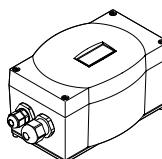

Positioner, displacement/integrated angular position detection

Direct mounting on quarter turn actuators according to VDE/VDI 3845-1 (IEC 60534-6-2)

[SE]

Positioner, displacement/external angular position detection

Remote connection with external displacement encoder

Flow rate

Note: The precise choice of a positioner for the actuator depends on the specific application. Please contact your local Festo representative.

[50]

50 l/min

- Combinations of positioner and quarter-turn actuator DFPD with size <240
- Combinations of positioner and quarter-turn actuator DAPS with size <240

[130]

130 l/min

- Combinations of positioner and quarter-turn actuator DFPD with size >=240
- Combinations of positioner and quarter turn actuator DAPS with piston Ø >=240
- Combinations of positioner and linear actuator DFPI with piston Ø >= 100 mm

Characteristics

Safety function

Predefinable fail-safe position

In the event of a system failure, a fail-safe position (fail-safe mode/opening or closing in the event of a system failure, Fail in Place/hold position in the event of a system failure) for the process valve can be defined in advance. A system failure occurs if the operating voltage supply fails or if the setpoint specification fails.

[A]	Opening or closing in the event of system failure	[C]	Hold position in the event of a system failure
-----	---	-----	--

Positioner CMSX

Type code

001	Series	006	Position feedback
CMSX	Positioner for process automation	F1	4...20 mA
002	Product version	007	Function
P	Mainly polymer	D	Double-acting
003	Design type	S	Single-acting
S	Positioner, displacement/integrated angular position detection	008	Flow rate [l/min]
SE	Positioner, displacement/external angular position detection	50	50
004	Display type	130	130
C	LCD, backlit	009	Safety function
005	Reference value	A	Opening or closing in the event of system failure
U	Configurable (0...10V/0...20mA/4...20mA)	C	Hold position in the event of a system failure

Datasheet

General technical data				
Design type	Positioner, displacement/integrated angular position detection	Positioner, displacement/external angular position detection		
Safety function	Opening or closing in the event of a system failure	Hold position in the event of a system failure	Opening or closing in the event of a system failure	Hold position in the event of a system failure
Mode of operation	Double-acting, Single-acting	Double-acting	Double-acting, Single-acting	Double-acting
Design	Digital, electropneumatic positioner			
Mounting position	optional			
Type of mounting	With accessories			
Design characteristics	Safety position – pneumatic outlet 4 exhausted Safety position – pneumatic outlet 2 pressurised	Safety position - pneumatic outlets closed	Safety position – pneumatic outlet 4 exhausted Safety position – pneumatic outlet 2 pressurised	Safety position - pneumatic outlets closed
Functional principle of measuring system	Potentiometer			
Sensing range	0 ... 100 deg	–		
Display	7-segment LCD display With backlighting			
Setting options	Via display and keys			
Size of dead zone	0.5 ... 10%			
Dimensions (W x L x H)	190 mm x 105 mm x 130 mm			
Product weight	970 g			
Standard nominal flow rate (standardised to DIN 1343)	50 l/min 130 l/min			
Pneumatic connection	G1/8			

General electrical data		
Design type	Positioner, displacement/integrated angular position detection	Positioner, displacement/external angular position detection
Nominal operating voltage DC	24 V	
Operational voltage range DC	21.6 ... 26.4 V	
Max. current consumption	600 mA	
Reverse polarity protection	For operating voltage connections	
Connection resistance	–	≤80 kOhm

Electrical characteristics - Analogue inputs	
digital input, signal range	0 - 10 V 0 - 20 mA 4 - 20 mA
Analogue inputs, max. dynamic range	0 - 24 mA 0 - 11 V
Analogue inputs, linearity error at 25 °C	0.5%
Analogue inputs, temperature coefficient	<0.02 %FS/K
Analogue inputs, resolution	16 bit
Analogue inputs, electrical isolation	no

Datasheet

Electrical characteristics - Analogue outputs

Analog outputs, overload protection	yes
digital output, signal range	4 - 20 mA
Analogue outputs, max. load impedance	$\leq 600 \text{ Ohm}$
Analogue outputs, linearity error at 25°C	0.5%
Analogue outputs, temperature coefficient	<0.02 %FS/K
Analogue outputs, resolution	12 bit
Analogue outputs, reverse polarity protection	yes
Analog outputs, short circuit current rating	yes
Analogue outputs, galvanic isolation	no

Electrical characteristics - Digital inputs

Characteristic for inputs	To IEC 61131-2, type 3
Switching input	PNP, NPN
Digital inputs, reverse polarity protection	yes
Digital inputs, electrical isolation	Yes, via optocoupler

Electrical characteristics - digital outputs

Switching output	3 x PNP or 3 x NPN, switchable
Digital outputs, output current	100 mA
Digital outputs, reverse polarity protection	yes
Digital outputs, overload protection	yes
Digital outputs, short circuit current rating	yes
Digital outputs, electrical isolation	Yes, via optocoupler

Datasheet

Electromechanics		
Design type	Positioner, displacement/integrated angular position detection	Positioner, displacement/external angular position detection
Electrical connection 1, function	3x digital output Analogue output Analogue input Digital input Power supply Load power supply	
Electrical connection 1, connection type	Terminal strip	
Electrical connection 1, connector system	Screw terminal	
Electrical connection 1, number of connections/cores	13	
Electrical connection 1, tightening torque	0.6 Nm	
Electrical connection 1, conductor cross section	<1.5 mm ²	
Electrical connection 2, function	–	External path/angle sensor
Electrical connection 2, connection type	–	Terminal strip
Electrical connection 2, number of connections/cores	–	3
Electrical connection 2, tightening torque	–	0.6 Nm
Electrical connection 2, conductor cross section	–	<1.5 mm ²
Permissible cable diameter	7 - 13 mm for electrical connection 1	3 - 6.5 mm for electrical connection 2, 7 - 13 mm for electrical connection 1
Cable fitting	M20 x 1.5 for electrical connection 1	M12 x 1.5 for electrical connection 2, M20 x 1.5 for electrical connection 1
Max. cable length	30 m for electrical connection 1	3 m for electrical connection 2, 30 m for electrical connection 1

Operating and environmental conditions		
Operating pressure	0.3 ... 0.8 MPa	
Operating pressure	3 ... 8 bar	
Operating pressure	43.5 ... 116 psi	
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]	
Note on operating and pilot medium	Lubricated operation not possible	
Ambient temperature	-5 ... 60°C	
Storage temperature	-20 ... 60°C	
Relative air humidity	5 - 95%, Non-condensing	
Pollution degree	3	
Shock resistance	Shock test with severity level 1 to FN 942017-5 and EN 60068-2-27 As per EN 60068-2-29	
Vibration resistance	Transport application test with severity level 2 to FN 942017-4 and EN 60068-2-6 As per EN 60068-2-6	
CE mark (see declaration of conformity) ¹⁾	To EU EMC Directive In accordance with EU RoHS Directive	
UKCA marking (see declaration of conformity) ²⁾	To UK instructions for EMC To UK RoHS instructions	
Approval	RCM trademark	
Degree of protection	IP65
