

# 技术参数

介质:	压缩空气
接口尺寸:	G1/4
工作温度:	-40 ... 85 °C
流量:	550 l/min
温度效应:	typically 0.02% of span for 20°C for 20°C span and zero over operating range; 典型值 0.1% / °C
总误差:	±0.5% of span (typical, independent error includes the combined effect of non-linearity, hysteresis, dead repeatability)
故障模式:	signal falls to bleed pressure when electrical supply fails; 当电源故障时, 信号降到放气压
电源灵敏度:	3e-02% span/output change per 250 supply pressure change; >0.025% 满量程输出 化
控制信号:	0..10 V
输出压力:	0.2 ... 6 bar
