# Kelvin II Series Valve Controllers

ENGINEERING YOUR SUCCESS.

#### Superheat Control

- True pressure / temperature stand-alone superheat controller via EEV control
- Remote access via Modbus
  or BACnet
- Pumpdown mode via dry contact input
- Manual valve positioning
- Energy efficient system operation though more accurate valve control

### Subcool Control

- Controls liquid temperature using an EEV
- Provides secondary control of superheat for system protection
- Displays actual leaving liquid temperature, superheat, suction pressure, valve position, controller status, and alarms
- Pumpdown mode via dry contact input
- Manual valve positioning
- Remote access via Modbus

## **Temperature Control**

- Temperature control via electric valve (ie: SDR)
- Increased operating limits (-50°F to +299°F)
- Remote access via Modbus
- Pumpdown mode via dry contact input
- Manual valve positioning
- Advanced algorithm with AUTO PID to optimize system performance
- Optional high temperature selection for discharge control (60°F to +299°F) with 98.6K temperature sensor
- Optional temperature delta control (maintains T1-T2)

# Kelvin II Series

Valve Controllers

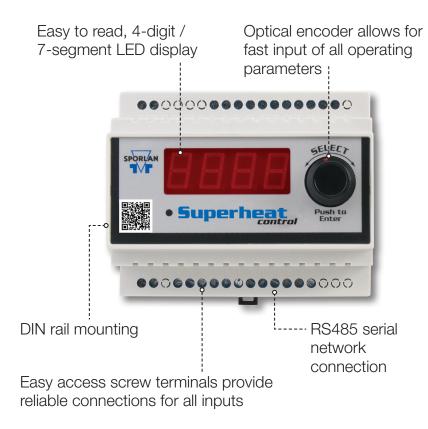

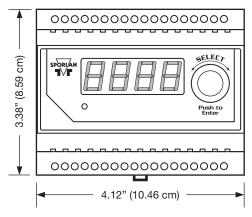

The Sporlan **Kelvin II Series** valve controllers provide unmatched control of electric valves for a variety of applications.

The superheat control provides **true pressure / temperature superheat control** via an EEV utilizing Sporlan's unique control algorithms, while the subcool control replaces mechanical subcooling that **combines liquid temperature control AND minimum superheat control**. The temperature and pressure controls allow precise **control of air temperature and pressure** using electric valves (SDR and CDS). Chiller and Secondary Fluid controls are also available.

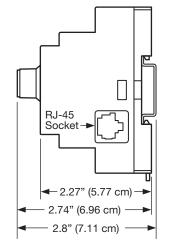

The Kelvin II controller line boasts **both integrated and remote display options**, **networking capability**, **Auto PID** and simple setup and operation.

The Kelvin II line of controllers is the perfect solution for installations that require precis

Small and simple design makes installation and setup easy and fast

- Controls electric evaporator regulator valve (CDS) or hot gas bypass valve (SDR) to regulate system pressure
- Remote access via Modbus or **BACnet**
- Pumpdown mode via dry contact input
- Manual valve positioning
- Advanced algorithm with AUTO PID to optimize system performance
- · Head pressure control to replace mechanical A8 and A9 valves
- · Supports inlet or outlet regulator (ie: A80E)

# **Chiller Control**

- Controls EEV on most compact chillers
- · Remote access via Modbus or **BACnet**
- Provides liquid temperature and superheat (P-T) control for common refrigerants
- Pumpdown mode via dry contact input
- Allows manual valve positioning

#### Secondary Fluid Control

- Controls Sporlan SFV stepper valve on medium temperature secondary fluid
- Remote access via Modbus
- Provides optimum efficiency, using liquid in, liquid out, and discharge air temperatures
- Allows manual valve positioning

All models are UL approved.

e and automatic control of temperatures and pressures in a wide variety of applications.

#### Accessories

Item Description	Item Number	Notes				
Parker Sporlan Temperature Probes*						
2K Sensor	952662	Surface sensor				
2K Sensor / Well Assembly	952795	Sensor and well assembly				
3K Sensor - Brass	952551	Not used with well				
10K Sensor - Blue wire	230076	Not used with well				
10K Sensor - Orange wire	230072	Not used with well				
10K Sensor - Red wire	230078	Not used with well				
10K Sensor - Green wire	230073	Not used with well				
10K Sensor - Yellow wire	230075	Not used with well				
98.6K Sensor	952565	High temperature sensor not used with well				
Parker Sporlan Pressure Transducers**						
PSPT0150SVSP-S	952572	0-150 psis transducer (all other refrigerants)				
PSPT0300SVSP-S	952574	0-300 psis transducer (R410A)				
PSPT0500SVSP-S	952576	0-500 psis transducer (R744)				
PSPT0652SVSP-S	952579	0-652 psis transducer				
Transducer Cables						
PSPT000000CP50	953100	5 meter cable				
PSPT000000CP20	953192	2 meter cable				
Miscellaneous						
Power Supply	953444	Input: 100-240 VAC; Output: 24 VDC, 60W				
SMA-12	953276	Handheld digital instrument for testing EEV performance.
